Total 2023 US Deaths by Violence and Suicide: 65 (Named Below)

The Remembering Our Dead site “gives details of trans people known to have been killed, as collated from reports by Transgender Europe and trans activists worldwide. Details are also given for those lost to suicide where known.

“A big thanks are due to the many trans activists and organisations worldwide who work tirelessly collate data on anti-trans violence and in particular to the members and admins of the Trans Violence News Facebook group, without whose support this site would not be possible.

“All material presented is gathered from publicly available sources. Please don't read anything into the raw numbers. What matters is the lives lost”
